

health privacy

PROFESSIONAL workshop

A Health Informatics Bootcamp Program

WORKSHOP PROGRAM

- > Designed to support healthcare organizations in meeting their privacy obligations under privacy legislation.
- > Makes use of real-life case studies and workshop activities to show how theory is put into practice.
- > Provides an opportunity to share your privacy experiences and interventions and to learn from your healthcare colleagues.
- > includes access to 5 hours of online lectures.

WORKSHOP OBJECTIVES

- > To provide privacy professionals and those responsible for privacy in an organization with the skills, knowledge and tools needed to fulfill legal and corporate privacy obligations.
- > To enable privacy officers and others to demonstrate to executives, clients, patients, staff and other stakeholders that the organization is undertaking effective measures to protect personal information.
- > To create a professional community and network of trained privacy professionals in healthcare.
- > To provide key knowledge and skills towards becoming a privacy officer.

WORKSHOP CONTENT

- > Privacy Fundamentals
- > Privacy Laws and Principles
- > Privacy Impact Assessment
- > Managing Privacy Risks
- > Implementing a Privacy Program
- > Engaging Stakeholders
